## Amendments to the Claims

This listing of claims will replace all prior versions and listings of claims in the application.

## Listing of Claims

- 1. (original) Use of a cyclopentenone prostaglandin in the manufacture of a medicament for delaying the onset and/or preventing the continuation of labour in a female.
- 2. (original) Use of a cyclopentenone prostaglandin in the manufacture of a medicament for preventing and/or reducing an inflammatory response in the reproductive system of a female.
- 3. (original) A use according to Claim 2 wherein the female is pregnant.
- 4. (currently amended) A use according to Claim 1 or 3 wherein the female is human and the duration of pregnancy is more than approximately 13 weeks.
- 5. (original) A use according to Claim 4 wherein the duration of pregnancy is approximately between 20 and 32 weeks.
- 6. (currently amended) A use according to any preceding claim  $\underline{1}$  wherein the medicament reduces and/or prevents an

inflammatory response in the reproductive system of a female associated with the onset or continuation of labour.

- 7. (currently amended) A use according to any preceding claim  $\underline{1}$  wherein the medicament reduces and/or prevents an inflammatory response in the reproductive system of a female associated-with infection by a pathogenic agent.
- 8. (original) A use according to Claim 7 wherein the pathogenic agent is viral, bacterial or fungal.
- 9. (original) A use according to Claim 6 wherein the inflammatory response is activated by stretch of the uterus.
- 10. (currently amended). A use according to any preceding claim 1 wherein the medicament reduces and/or prevents one or more of the following conditions: pre-term labour; pathogenic infection; cervical ripening, uterine contractions.
- 11. (currently amended) A use according to any preceding claim  $\underline{1}$  wherein the medicament reduces and/or prevents fetal or neonatal damage.
- 12. (original) A use according to Claim 11 wherein the fetal or neonatal damage is brain damage.

- 13. (original) A use according to Claim 12 wherein the fetal or neonatal damage is one or more of the following conditions: astrogliosis; loss of myelin- producing oligodendrocytes; multifocal necroses resulting in cystic change (periventricular leucomalacia, PVL).
- 14. (currently amended) A use according to any preceding claim  $\underline{1}$  wherein the cyclopentenone prostaglandin is 15-deoxy- $\Delta^{12,14}$ -prostaglandin  $J_2$  and/or prostaglandin  $A_1$  and/or is a prodrug of 15-deoxy- $\Delta^{12,14}$ -prostaglandin  $J_2$  and/or prostaglandin  $A_1$ .
- 15. (original) A use according to Claim 14 wherein the prodrug  $isPGD_2$  or  $PGE_1$ .
- 16. (currently amended) A use according to any preceding claim  $\underline{1}$  wherein the medicament further comprises a pharmaceutically acceptable excipient, diluent or carrier.
- 17. (currently amended) A use according to any preceding claim  $\underline{1}$  wherein the medicament is in a form adapted for delivery by mouth.
- 18. (currently amended) A use according to any preceding claim  $\underline{1}$  wherein the medicament is in a form adapted for delivery by intravenous injection.

- 19. (currently amended) A use according to any preceding claim  $\underline{1}$  wherein the medicament is in a form adapted for delivery by intra-amniotic injection.
- 20. (currently amended) A use according to any preceding claim  $\underline{1}$  wherein the medicament is in a form which is compatible with the amniotic fluid.
- 21. (currently amended) A use according to any preceding claim 1 wherein the medicament further comprises an agent for treating a female who has or is at risk of one or more of the following conditions: pre-term labour; pathogenic infection; cervical ripening, uterine contractions.
- 22. (original) A use according to Claim 21 wherein the agent is a corticosteroid.
- 23. (currently amended) A use according to Claim 21  $\frac{1}{100}$  wherein the agent is capable of preventing and/or reducing respiratory distress syndrome in the neonate.
- 24. (original) A use according to Claim 23 wherein the agent is selected from dexamethasone or betamethasone.

- 25. (original) A use according to Claim 21 wherein the condition is preterm labour and the agent is capable of delaying delivery.
- 26. (original) A use according to Claim 21 wherein the condition is uterine contractions and the agent is a tocolytic agent.
- 27. (original) A use according to Claim 26 wherein the tocolytic agent is selected from oxytocin receptor antagonists, calcium channel blockers, sympathomimetics, nitric oxide donors.
- 28. (original) A use according to Claim 27 wherein the oxytocin receptor antagonist is Atosiban.
- 29. (original) A use according to Claim 27 wherein the calcium channel blocker is Nifedipine.
- 30. (original) A use according to Claim 27 wherein the sympathomimetic is Ritodrine.
- 31. (original) A use according to Claim 27 wherein the nitric oxide donor is glyceryl trinitrate.

- 32. (currently amended) A use according to any preceding claim  $\underline{2}$  wherein the inflammatory response is mediated by NF $\kappa$ B in uterine cells.
- 33. (original) A use according to Claim 32 wherein the cyclopentenone prostaglandin is capable of inhibiting and/or reducing NF $\kappa$ B activity by preventing and/or reducing NF $\kappa$ B DNA-binding in uterine cells.
- 34. (original) A use according to Claim 33 wherein the cyclopentenone prostaglandin is capable of inhibiting and/or reducing NF $\kappa$ B activity by preventing and/or reducing NF $\kappa$ B-mediated transcriptional regulation in uterine cells.
- 35. (original) A use according to Claim 34 wherein the cyclopentenone prostaglandin is capable of inhibiting and/or reducing NF $\kappa$ B activity by preventing and/or reducing NF $\kappa$ B production in uterine cells.
- 36. (original) A pharmaceutical composition comprising a cyclopentenone prostaglandin and a pharmaceutically acceptable carrier or exipient, the cyclopentenone prostaglandin being present in an amount effective to prevent and/or reduce an inflammatory response in the reproductive system of a female.

37. (currently amended) A method of treating inflammation within the reproductive system of a female, the method comprising administering an effective amount of a medicament as defined in any one of the preceding claims claim 1 to a subject in need thereof.
